

- Rule # 1: Let the trade to come you; either to a level or to a zone.
- Rule #2: Only engage in a new trade which has at least two or more confirmations for the entry followed by confirmation with overbought/oversold signals (Sigma 3, zero/0 Sigma, & CI indicators)

Fibonacci Retracement Levels

Trend Lines

Support & Resistance Levels

Daily Pivot Levels

10min &/or 60min Moving Averages (mainly 200bar)

- Rule #3: Never force a trade (just to trade) or chase a move, event, or headline. If initial move is missed map out a retrace level or zone which is confirmed at/near zero/0 Sigma.
- Rule #4: Trade levels; always base trade entries, profit scales, and trade exits on levels and zones. Never base a bias on P&L. P&L will work its self out as long as sticking to levels and trading rules.
